tunes

Music to lose yourself. And find yourself again.

Rolla Tunes creates uplifting Drum & Bass that helps people feel lighter, freer and more alive.

Rolla Tunes is the creative partnership of Swiss artists Ralph Traber and Olivia John—two producers, songwriters and performers united by a shared passion for creating emotionally driven electronic music.

While Drum & Bass forms the heart of their sound, Rolla Tunes embraces a broader electronic palette. From cinematic orchestral textures and soulful liquid grooves to energetic dancefloor anthems, breakbeat-driven productions and selected electronic projects beyond Drum & Bass, every release is crafted with one purpose: to move people—both emotionally and physically.

Combining detailed production, evocative songwriting and powerful live vocals, Rolla Tunes creates immersive musical experiences that leave audiences feeling lighter, freer and more alive.

About Rolla Tunes

For Rolla Tunes, music is more than entertainment—it is a way to tell stories, bring people together and create moments that stay with listeners long after the final note has faded.

Rather than following trends or limiting themselves to a single sound, Ralph and Olivia explore the full emotional spectrum of electronic music. Their productions blend cinematic sound design, expressive melodies, dynamic rhythms and heartfelt songwriting, creating music that is equally at home on a festival stage, in a pair of headphones or on the big screen.

What truly defines Rolla Tunes is the creative partnership behind the project. Both Ralph and Olivia are deeply involved in every aspect of the creative process—from composing and production to songwriting, arrangement and performance. Their complementary strengths have shaped a distinctive sound that is both emotionally engaging and unmistakably their own.

Their live performances transform these productions into immersive experiences, combining original music with powerful live vocals to create an atmosphere that goes far beyond a traditional DJ set. Every performance is designed to connect with the audience, celebrate togetherness and leave people feeling energised, inspired and free.

Beyond their own music, Ralph and Olivia actively contribute to the growth of the Swiss Drum & Bass scene through their work with the BassStrasse organisation. Whether on stage, in the studio or within the community, their mission remains the same: to create music that connects people and reminds them that even in life's darkest moments, there is always light, movement and hope.

The live experience

More than a DJ set. A performance designed to move people.

A Rolla Tunes performance is more than a selection of tracks—it's a carefully crafted journey through emotion, energy and connection.

Blending original productions with powerful live vocals, cinematic soundscapes and the driving force of modern Drum & Bass, Ralph and Olivia create an immersive performance that balances intimate moments with explosive dancefloor energy.

Every set is built with intention. Moments of tension and release, light and darkness, stillness and movement come together to create an experience that keeps audiences engaged from beginning to end.

Whether performing in an intimate club or on a festival stage, Rolla Tunes aims to create more than excitement—they create connection. Their goal is simple: to leave every audience feeling energised, uplifted and inspired long after the music has ended.

Live Performance

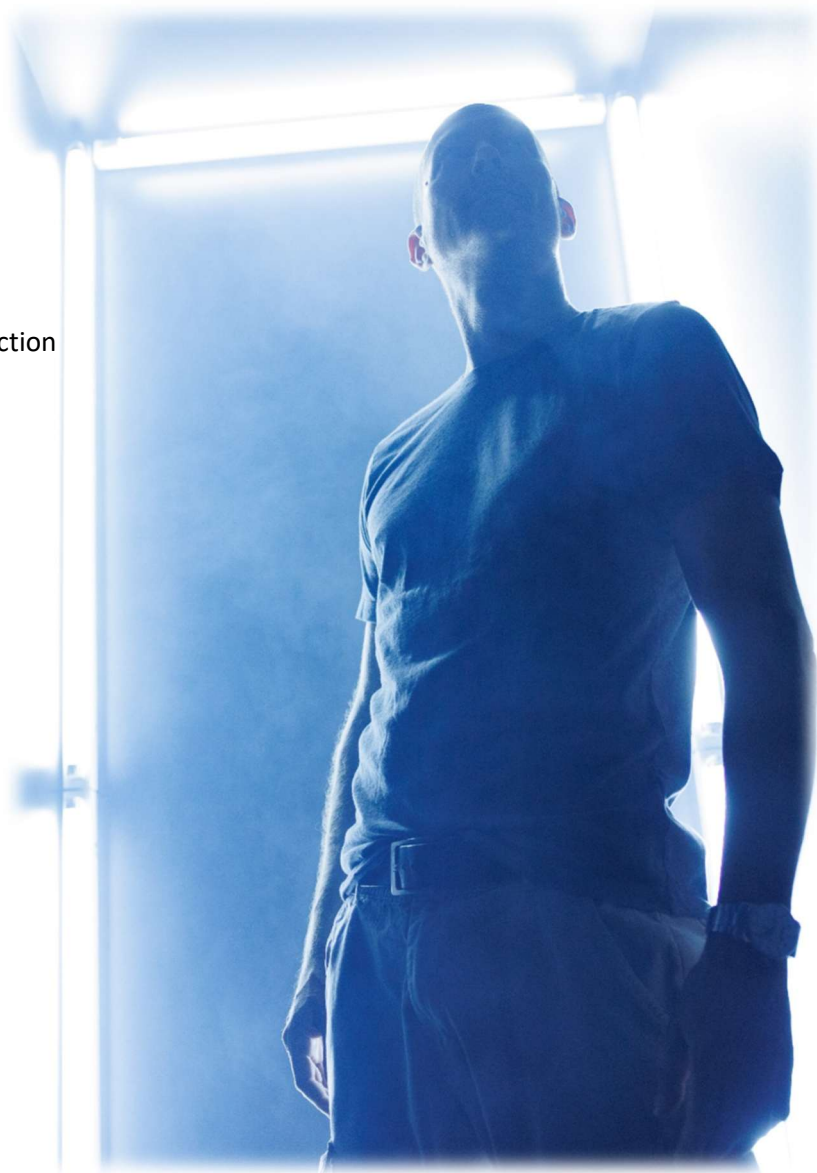

- ✓ Original productions
- ✓ Live vocals
- ✓ DJ performance
- ✓ Cinematic storytelling
- ✓ Emotional audience connection

Ideal for

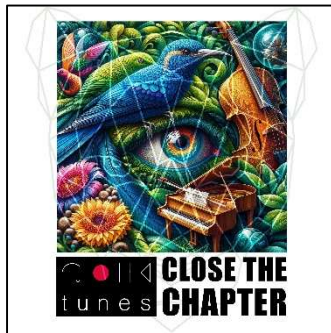

- ✓ Festivals
- ✓ Clubs
- ✓ Showcase events
- ✓ Cultural events

Genres

- ✓ Drum & Bass
- ✓ Liquid
- ✓ Dancefloor
- ✓ Cinematic
- ✓ Electronic
- ✓ Breakbeats

Music

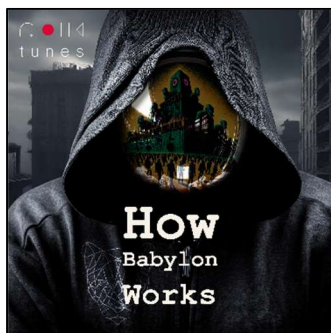

Close The Chapter

is a deeply atmospheric drum & bass piece blending orchestral textures and natural soundscapes with introspective lyricism. Forest ambience, sweeping strings and tribal percussion merge with a subtle 2-step rhythm and a layered bassline, revealing the tune's complexity on second listen. Olivia's expressive vocals explore themes of inner transformation and the courage to leave the past behind, making *Close The Chapter* both deeply personal and quietly empowering.

Nuff A Dem

is a dark, bass-driven track that hits hard with pounding drums, deep rolling basslines and a hypnotic Ragga-style vocal loop. The vocal hook adds a raw and urgent energy, giving the track a gritty edge that resonates deep on the dancefloor. It's a no-compromise banger built for sound system pressure and rave intensity. Already making a strong impact during live performances, *Nuff A Dem* stands as a bold statement from Rolla Tunes—fierce, unmistakable and designed to move bodies.

How Babylon Works

is a gripping Drum & Bass track exploring social injustice and manipulation. Inspired by a documentary about Bob Marley's political exploitation, it examines how power structures shape thoughts and behaviour. Musically, the track blends soulful R&B influences with driving breakbeats, alternating between 176 and 88 BPM to create tension and dynamic contrast. Its lyrics challenge conformity and question the systems that reward obedience while punishing those who resist.

The Shed

is a euphoric Drum & Bass anthem that captures the magic of unforgettable nights. Driven by massive drums, a hypnotic bassline, a soaring lead and captivating vocals, the track builds an irresistible momentum that keeps the energy rising from start to finish. It celebrates those rare moments when music unites people, time seems to stand still and nothing else matters. With its infectious hook — "Let this night never ever end – let's turn it up though!" — *The Shed* leaves listeners with only one desire: to keep the night alive.

ASMR

is a click & cuts-inspired electro track that continuously builds intensity while revealing an intricate world of hidden sonic details. Direct vocals, chopped vocal textures and evolving reverbs create an intimate, immersive atmosphere, while hi-hats crafted from vocal snippets add a subtle crackling sensuality. Minimal on the surface yet rich in detail, *ASMR* rewards every listen—and leaves listeners wondering: *What the heck was that?*

Our journey

Live

- Live performances featuring original productions and live vocals
- Performing at BassStrasse and independent venues across Switzerland

Music

- Growing catalogue of original releases
- Official music videos
- Available on all major streaming platforms

Community

- Active members of the BassStrasse organising team
- Supporting the Swiss Drum & Bass community

Looking ahead

- New releases in 2026/27
- European live performances
- Film & sync projects

2020

Formation of Rolla Tunes
